

I CLIMI NIVALI

COS'È IL CLIMA?

Media di condizioni metereologiche

Descrizione

Il clima nivale è caratterizzato da inverni freddi e gelidi ed estati prevalentemente fresche.

Con clima nivale si intende una tipologia di clima molto freddo, con precipitazioni generalmente scarse e prevalentemente nevose.

A world map with a light gray grid overlay, showing the continents in white and oceans in light blue. The map is centered on the Atlantic Ocean.

Biomi nivali

Un bioma nivale è un bioma che è caratterizzato da scarsa vegetazione e poche specie di fauna.

A wide-angle photograph of a winter landscape. The ground is covered in a thick layer of snow, reflecting the bright light from the sky. In the foreground, a large, snow-laden evergreen tree stands on the left. The middle ground is filled with a dense forest of snow-covered evergreens. The sky is a vibrant blue with wispy white clouds, and the sun is visible on the right side, creating a bright glow and casting long, soft shadows across the snow. The overall atmosphere is serene and peaceful.

SITOGRAFIA

A wide-angle photograph of a snowy winter landscape. The ground is covered in a thick, smooth layer of snow. Several evergreen trees of various sizes are scattered across the scene, their branches heavily laden with snow. In the background, a dense forest of similar trees stretches across the horizon. The sky is a mix of soft pinks, oranges, and blues, suggesting a sunset or sunrise. The overall atmosphere is quiet and serene.
